

New UNITOP 2011

This is the first news of 2011. Manufactured on the base of the same manufacturing technology of our under counters, it introduce a lot of improvements comparing to the old model:

- The structure is now a monocoque body and do not use any more the upper stopper, sealing much better.
- Piping are no more visible inside the tank but they are foamed in the structure of the cabinet
- New racks easy to remove in order to make easier to clean the inside tank and get the maximum of hygiene.
- New cover motor sheet opening sideways to make easier entering the motor unit area for condenser cleaning.

Always available three versions:

- Without working Top
- With working Top
- With working Top and splash back

But That's not all because the biggest news consists of a

NEW PRICE reduced of 20%.

Keep in contact with our sales department to get more information on the new UNITOP 2011
